

EMAIL AUTOMATION

TEAM : NOVAS

Rolls

- Vaishnavi - Scrum master/Planner
- Bhoomi - Developer
- Unati - Developer
- Mugda - QA
- Krushna - QA

PROJECT OVERVIEW:

- To automate email communication processes.
- The system allows users to send emails instantly, schedule emails, manage recipients, create templates, generate reports, and track email delivery status , pie chart creation , spam email deletion automatically .
- Also implemented AI voice notifications that read the received email aloud whenever a notification is triggered.
- The system reduces manual effort and improves communication efficiency.

Features:

- User Management.
- Email Template Management
- Email Scheduling & Sending
- Recipient Management
- Bulk Email
- Email Tracking
- Email Management
- Failure Handling
- Reports & Logs
- Reminder System
- Spam Management
- Analytics
- AI Voice Features

User Management.

- Register User
- Login User
- Store User
- Details Validate Password
- Authenticate User
- Logout User

Email Template Management

- Create Template
- Edit Template
- Delete Template
- View Template
- Save Template

Email Scheduling & Sending

- Send Email
- Schedule Email
- Send Scheduled Email
- Set Recurring Email
- Edit Schedule
- Cancel Schedule

Recipient Management

- Add Recipient
- Add Multiple Recipients
- Import Recipients from CSV
- Create Recipient Group
- Edit Recipient
- Delete Recipient

Bulk Email

- Send Bulk Emails
- Check Recipient List
- Process Bulk Emails
- Track Sending Progress
