

PROJECT NAME: PROCESS AUTOMATION

TEAM - AVENGERS

■ Team members:

Name	Roles
Divya Patil	Developer
Priya Bhavsar	Scrum master, QA
Dhanshri Mahajan	QA
Kanishka Gawali	Developer
Mansi Bari	Developer
Aarti Mirge	Developer

PROJECT OBJECTIVE

- The Process Automation System automates repetitive tasks by executing them automatically based on predefined schedules or triggers. The current phase focuses on backend functionality only.

❖ USER REQUIREMENTS

1. Account Management
2. Process creation
3. Task Scheduling
4. Process Execution
5. File handling
6. Notification
7. Maintain logs
8. Error handling

FR1.ACCOUNT MANAGEMENT

- Login
- Logout
- Different accounts(Admin/User)

FR2.PROCESS CREATION

- Create new automation workflows.
- Define process name and description.
- Add workflow steps.

FR3.TASK SCHEDULING

- Schedule one-time or recurring tasks.
- Execute tasks at the specified date and time.

FR4.PROCESS EXECUTION

- Execute automation tasks automatically.
- Support manual execution for testing.

FR5.FILE HANDLING

- Read input data from CSV or a database.
- Save output files if required.

FR6.NOTIFICATION

- Send email notifications after successful execution
- Send failure notifications when a process cannot complete.
- Support desktop notifications (optional).

FR7. MAINTAIN LOGS

- Record execution date and time.
- Record task status (Success/Failure).
- Store error details for debugging

FR8.ERROR HANDLING

- Handle missing files.
- Handle invalid input.
- Log unexpected exceptions without stopping the application

❖ ROLES AND WORKING HOUR

DEVELOPERS

Kanishka
Gawali

1.Account Management
(User,Admin)

(2 hr)

2. Notification

(2 hr)

3. Desktop
notification
(Optional)

(1 hr)

Total = 5 hrs.

Remaining
=1

Divya Patil

1. Process
creation

(2 hr)

2. Process
execution

(2 hr)

3. Add
workflow steps

(1 hr)

Total = 5 hrs.

Remaining
=1

❖ ROLES AND WORKING HOUR DEVELOPERS

Aarti Mirge

1.Task scheduling

(2 hr)

2.File handling

(2 hr)

3. Automatic
Task Execution

(1 hr)

Total = 5 hrs.

Remaining
=1

Mansi Bari

1. Maintain logs

(2 hr)

2. Error
handling

(2 hr)

3. Store error
details for
debugging

(1 hr)

Total = 5 hrs.

Remaining
=1

❖ ROLES AND WORKING HOUR

TESTERS

Dhanashri
Mahajan

1.Account Management

(1 hr)

2. Task
Scheduling,
Notification
(1 hr)

3. File
handling
(1 hr)

Total = 3 hrs.
Remaining
=0

Priya Bhavsar

1. Process
creation,
execution
(1 hr)

2. Maintain
logs
(1 hr)

3. Error
handling
(1 hr)

Total = 3 hrs.
Remaining
=0

THANK YOU!
